THE STATE OF GEORGIA

VICTIM SERVICES STATISTICAL REPORT (VSSR)
HOW-TO GUIDE

CJCC | VSSR How-To Guide Overview

The following pages are designed to assist you with completing the Criminal Justice Coordinating Council (CJCC) Victim Services Statistical Report (VSSR).

The VSSR is a quarterly report administered by CJCC that collects victim services data on a county level by victimization type. It is a required report for all VOCA, VAWA, and SASP award subgrantees. These data are used for the following: to complete federal reports, monitor the use of grant funds, help improve services, identify areas of need throughout the State, and to substantiate continued and increased federal funding.

To assist with completing the VSSR, this document will provide helpful tips and show you how to:

- Navigate the Report
- Calculate your Grant Percentage(s)
- Complete the Services Grids
- Complete the Service Units Grids
- Complete the Demographic Grids - Age, Gender, Race, Disability
- Complete the Underserved Population Section

For more detailed information about the VSSR, please refer to the VSSR Guide and webinars available on the [CJCC Website](#).

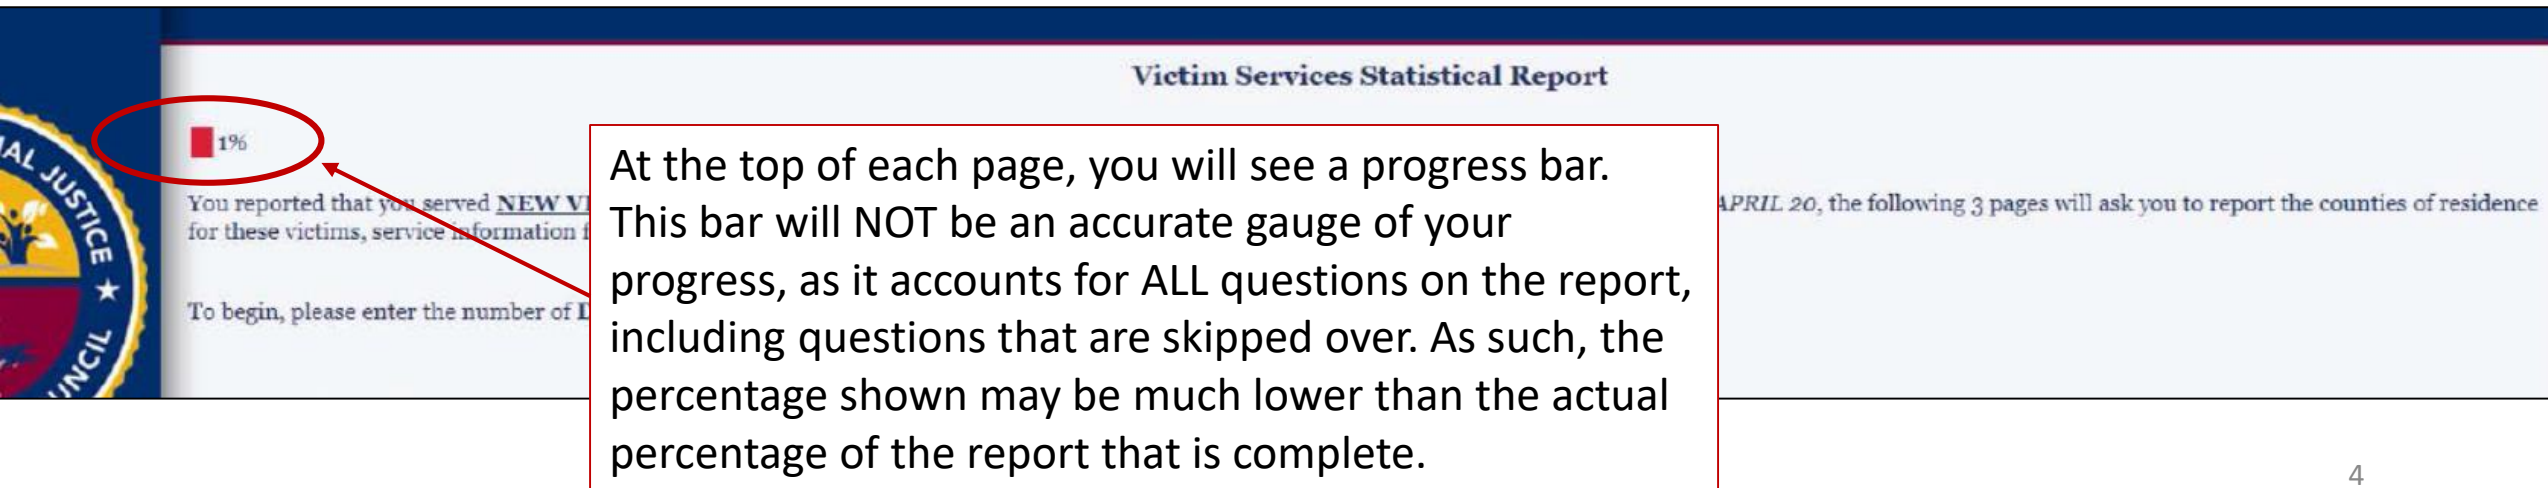

Navigating the Report

The VSSR is broken into 4 main sections:

- New Victims
- Existing Victims
- Secondary Victims (Matches format of New and Existing sections)
- Underserved Populations (Based on the new, existing, and secondary victims reported.)

**Note: In Quarter 4, VOCA recipients also have to answer questions regarding Agency Capacity, Victims Compensation, and general narratives.*

The screenshot displays the 'Victim Services Statistical Report' interface. On the left, a progress bar is shown with a red square and the text '1%'. A red circle highlights the '1%' text, and a red arrow points from this circle to a text box on the right. The text box contains the following text: 'At the top of each page, you will see a progress bar. This bar will NOT be an accurate gauge of your progress, as it accounts for ALL questions on the report, including questions that are skipped over. As such, the percentage shown may be much lower than the actual percentage of the report that is complete.'

Calculating Grant Percentages

CJCC | Grant Percentages

What Are Your Grant Percentages?

INSTRUCTIONS

If your agency receives funding to provide direct victim services through VOCA, VAWA and/or SASP, you must report the percentage of each funding source relative to your agency's overall budget. If you receive victim assistance funding through the Crime Victims Act (FVPSA), state grants (i.e., State Domestic Violence and/or Sexual Assault funds), and/or 5% funds, you will need to report those percentages as well. The total of all percentages combined should NOT total more than 100%.

Example:

Your agency's budget breakdown is the following:

- VOCA Grant – 35%
- SASP Grant – 5%
- VAWA – 15%
- State Sexual Assault Grant – 10%
- United Way – 10%
- Major Events – 15%
- 5% Funding – 10%

You should report 35% for VOCA, 5% for SASP, 10% for 5 percent, 10% percent for State Sexual Assault, and 15% for VAWA. Please remember you will now be submitting agency-wide data regardless of the funding source when entering data.

Please enter your **VOCA** grant percentage in reference to your overall agency's budget, if you do not have this grant please enter 0 :

Please enter your **VAWA** grant percentage in reference to your overall agency's budget, if you do not have this grant please enter 0 :

Please enter your **SASP** grant percentage in reference to your overall agency's budget, if you do not have this grant please enter 0 :

Please enter your **State Domestic Violence** grant percentage in reference to your overall agency's budget, if you do not have this grant please enter 0 :

Please enter your **State Sexual Assault** grant percentage in reference to your overall agency's budget, if you do not have this grant please enter 0 :

Please enter your **FVPSA** grant percentage in reference to your overall agency's budget, if you do not have this grant please enter 0 :

Please enter your **5%** grant percentage in reference to your overall agency's budget, if you do not have this grant please enter 0 :

These percentages should be based on your total DIRECT VICTIM SERVICES BUDGET

Agencies should report on agency-wide data on all victims who were provided with direct services, regardless of funding source and program type. Using the percentages report, CJCC will prorate the data on the agency's behalf to determine the number of victims served by grant type.

To calculate your grant percentage:

- First, determine your total direct victim services budget for your agency.
- Then, determine the amount of each CJCC grant awarded.
- Divide the amount of the CJCC grant by the total direct victim services budget amount.
- This percentage is your grant percentage.

Example:

So, let's say your overall victim services budget is \$100,000: your agency was awarded \$25,000 for VOCA, \$25,000 for VAWA, and the remaining \$50,000 in your victim services budget comes from United Way and general donation funds. Your agency has both a Domestic Violence program, as well as a Sexual Assault Center. When reporting, you will submit data for both programs in one report, and you will input 25% as the grant percentage for your VOCA award and 25% as the grant percentage for your VAWA award.
