

## **Juvenile Justice Reinvestment Grant Site Visits**

Site visits for the Juvenile Justice Reinvestment Grant will be conducted by CJCC in an effort to provide onsite technical assistance for all grantees. The overall purpose of each visit will be identifying and addressing issues related to implementation and financial reporting.

Much of the focus will be centered on ensuring Project Director's are equipped with the full Knowledge of the grant requirements.

Each site visit will provide an opportunity for key personnel responsible for submitting required reports to request the technical assistance needed to properly address issues related to submitting reimbursement requests and submitting progress reports.

Each site visit will allow each grantee the opportunity to:

- Share information about their agency
- Disclose how the grant funds are being used within the organization
- Discuss how the Juvenile Justice funding will impact the organization
- Outline program goals and performance objectives
- Discuss some of the agency's challenges
- Discuss some of the agency's strengths
- Disclose the agency's best practices
- Identify areas, if any where CJCC can provide additional guidance/training
- Offer suggestions related to processes that could be changed/streamlined to improve the efficiency of the entire grant process, including:
  - a) Application process
  - b) Award process
  - c) Reimbursement process
  - d) Financial reporting
  - e) Programmatic reporting

*\*For more information about upcoming site visits please refer to your grant auditor/specialist \**
